

DATA COLLECTION AND DATA SOURCE IDENTIFICATION REPORT :-

Submitted by :- Saloni kaushal

Internship :- Data Analytics Internship

Task 1:- Data collection and Data source identification

1.Introduction :-

Data is the foundation of every analytics project. The objective of this task is to identify reliable data sources , understand different types of data , and collect sample datasets for future analysis .

For this task , both Primary Data and Secondary Data sources were used.

2. Primary Data source :-

Dataset name :- Daily mood prediction and lifestyle survey dataset

Source :- Google forms survey

Data type :- Primary Data

Collection method :-

A google form questionnaire was designed and distributed online to collect data directly from participants . The survey gathered information about daily mood,sleep patterns ,physical activity , stress leves , screen time , and other lifestyle related factors.

Dataset Size:

- Total Records: **51**
- Total Features: **21**

Features:

Age, Gender, Occupation, Sleep Hours, Sleep Quality, Breakfast, Water Intake, Exercise, Activity Level, Screen Time, Social Media Usage, Study/Work Hours, Family/Friends Time, Stress Level, Energy Level, Weather, Significant Event, Caffeine Intake, Day Satisfaction, and **Mood Today** (Target Variable).

Description:

The dataset contains **51 responses** and **21 features** related to lifestyle, health, and daily activities. It is used to predict a person's daily mood based on these factors.

Purpose:- The purpose of this survey was to understand how lifestyle habits influence an individual's daily mood . The collected data can be used for mood prediction analysis and to identify relationships between lifestyle factors and emotional well-being.

3. Secondary Data source :-

Dataset name:- Amazon Sales Dataset

Source :- Kaggle

Data type :- Secondary Data

Dataset Size

- **Total Records:** 128,975
- **Total Features:** 24

Features

Index, Order ID, Date, Status, Fulfilment, Sales Channel, Ship Service Level, Style, SKU, Category, Size, ASIN, Courier Status, Quantity (Qty), Currency, Amount, Ship City, Ship State, Ship Postal Code, Ship Country, Promotion IDs, B2B, Fulfilled By, and Unnamed: 22.

Description

The Amazon Sale Report dataset contains **128,975 records** and **24 features** related to Amazon sales transactions. The dataset includes order details, product information, shipping information, sales amount, order status, and fulfillment data. It is used for sales analysis, customer behavior analysis, and business insights.

Collection method :-

The dataset was downloaded from kaggle , a public platform that provides datasets for data science and analytics projects.

Format :- Comma separated Values- CSV (.csv)

Purpose:- The dataset was selected for learning data analysis and understanding real-world Business data.

4. Primary Data vs Secondary Data :-

Primary data	Secondary data
1.Collected directly by the researcher	1.Collected by another person or organization
2. Specific to the research objective	2. Available for public use
3. Time consuming to collect	3. Easy to obtain
4. Example :- Google form survey	4. Example :- Kaggle dataset

5. Common Data Formats :-

1. CSV (Comma Separated Values)
2. XLSX (Microsoft Excel)
3. JSON (JavaScript Object Notation)
4. XML (Extensible Markup Language)
5. SQL Database Files

6. Data Validation :-

The collected data sources were validated using the following criteria :-

- Source Credibility
- Data completeness
- Availability of records
- Structured format
- Ease of analysis

Both datasets met the basic validation requirements and were considered suitable for analytics purposes.

7. Sample raw data :-

1. Primary Dataset

The screenshot shows a Google Sheet titled 'Daily mood Prediction'. The 'Form Responses' table is displayed, containing 11 rows of data. The columns are: Timestamp, 1. Age, 2. Gender, 3. What is your occupation?, 4. How many hours did you sleep last night?, and 5. How would you rate your sleep quality?.

	Timestamp	1. Age Example: 21	2. Gender	3. What is your occupation?	4. How many hours did you sleep last night?	5. How would you rate your sleep quality?
2	04/06/2026 22:45:34	22	Female	Student	6-7 hours	Average
3	04/06/2026 22:47:00	22	Female	Student	6-7 hours	Average
4	04/06/2026 23:07:03	20	Female	Student	Less than 4 hours	Poor
5	04/06/2026 23:41:41	21	Female	Student	4-5 hours	Poor
6	05/06/2026 04:51:37	22	Male	Working Professional	6-7 hours	Good
7	05/06/2026 07:03:01	21	Female	Student	8-9 hours	Excellent
8	05/06/2026 08:07:40	21	Female	Student	8-9 hours	Average
9	05/06/2026 08:10:02	21	Female	Student	6-7 hours	Good
10	05/06/2026 08:10:37	21	Male	Student	8-9 hours	Excellent
11	05/06/2026 08:24:06	21	Female	Unemployed	8-9 hours	Good

The screenshot shows a Google Sheet titled 'Daily mood Prediction'. The 'Form Responses' table is displayed, containing 11 rows of data. The columns are: 6. Did you eat breakfast today?, 7. How many glasses of water did you drink today?, 8. How many minutes did you exercise today?, 9. How active were you today?, and 10. Total screen time today?.

	6. Did you eat breakfast today?	7. How many glasses of water did you drink today?	8. How many minutes did you exercise today?	9. How active were you today?	10. Total screen time today?
2	No	1-3	0 Minutes	Moderately Active	4-6 Hours
3	Yes	7-9	1-15 Minutes	Slightly Active	4-6 Hours
4	Yes	4-6	1-15 Minutes	Slightly Active	Less than 2 Hours
5	No	10-12	0 Minutes	Slightly Active	4-6 Hours
6	No	1-3	0 Minutes	Very Active	4-6 Hours
7	Yes	1-3	0 Minutes	Slightly Active	4-6 Hours
8	No	4-6	16-30 Minutes	Moderately Active	4-6 Hours
9	Yes	4-6	0 Minutes	Moderately Active	2-4 Hours
10	No	10-12	31-60 Minutes	Slightly Active	4-6 Hours
11	Yes	10-12	0 Minutes	Moderately Active	4-6 Hours
